

Floors you'll love to live with.

COREtec Plus[®]

100% WATERPROOF · 100% KIDPROOF · 100% PETPROOF!

What is COREtec?

COREtec is a patented, revolutionary technological advancement in Vinyl Flooring. We created a high-density, extra strong and dimensionally stable composite core using virgin polymers, recycled wood and bamboo into a waterproof core (hence the name). A luxury vinyl wear layer is then permanently bonded to this waterproof core, a concept developed and patented by USFloors creating the Original COREtec Floor.

We added cork to each plank to create COREtec Plus®.

Enjoy the look of wood or stone with the comfort of cork. By adding the cork backing, we have taken COREtec to the next step. COREtec Plus floors are quieter and warmer than ordinary LV products and require no additional underlayment. COREtec Plus flooring can be installed easily over existing hard surfaces and can even conceal imperfections in subfloors eliminating the need for expensive subfloor preparations.

COREtec Plus®...Plus...Plus...Plus...

COREtec Plus features a 20 mil commercial-rated wear layer for maximum durability. *PLUS*, our UV acrylic finish provides superior stain resistance and cleanability. The patented construction of COREtec Plus is extremely stable and will not expand or contract under normal conditions. No need for expansion strips in large rooms. No acclimation is required prior to installation, so buy it today and start living on it tonight!

100% WATERPROOF · 100% KIDPROOF · 100% PETPROOF!

Presenting the family of
COREtec Plus® products

COREtec Plus®

COREtec™ Core Structure

- high-density extruded waterproof core
- stable: will not expand or contract under normal conditions
- glueless profile for easy installation

**The PLUS is the Attached
Cork Underlayment**

- provides added sound insulation
- no need for separate underlayment
- naturally resists mold & mildew
- absorbs subfloor imperfections
- creates a comfortable warm floor

GREENGUARD. Yes, It's a BIG deal!

Whenever you are purchasing a luxury vinyl floor, indoor air quality and chemical exposure is something you should consider.

The Greenguard Environmental Institute is an industry-independent scientific testing organization that certifies products and materials for low chemical emissions.

We're proud to say that all COREtec™ products are certified GREENGUARD GOLD, which means that not only do we meet the standards for residential use, our products are safe for use in schools, daycares and other sensitive environments.
