

2017 LOOKBOOK

# HARDWOOD

MANNINGTON  
RESIDENTIAL.

SHOWN: Mountain View Hickory Smoke

## A NEW TAKE ON NATURAL

Across the world, wood is found in endless combinations of patterns, textures and tones. Mannington's hardwood floors capture not only the organic look and feel, but the beautiful variety of visuals that natural wood provides.

Rustic and refined, light and simple, our hardwoods are designed with a sophistication that suits any interior. Mannington's in-house design team crafts every style with precision and intention, resulting in a look that is both timeless and on-trend. Our elevated aesthetic is achieved through innovative design techniques — from subtle wire brushing and distressing to carefully applied stain. The result: gorgeous tones flowing through large-scale grain.

Proprietary Mannington technologies, including ScratchResist™, provide unparalleled durability and protection. And because they are made from engineered hardwood — real wood, constructed of plies instead of a single slab — they offer more dimensional stability anywhere in the home — above, on and below the grade.

Style, aesthetic, performance: hardwood flooring at its finest.

Designed to reflect the latest trends in the American home, Mannington hardwood floors offer beauty, durability, and performance.

Award-winning, exclusive styles and designs take any room to new heights, from the floor up.

Be sure to visit [Mannington.com](http://Mannington.com) or visit your local Mannington dealer for complete product information.
