

Welcome to a new era  
of inspiration

THE  
**original**  
PREFINISHED  
WOOD FLOORING

Proudly made in North America

Mercier is the pioneer in manufacturing prefinished wood flooring.

Our goal, which stemmed from a visionary and practical need to eliminate on-site finishing of wood floors, was the springboard to our culture of innovation. Dust from sanding, drying times and emissions in the home are now inconveniences of the past thanks to the bold, creative drive that transformed the industry over four decades ago.

It is thanks to this culture of innovation, which permeates throughout everything Mercier does, that we have developed a renowned mastery of wood itself, the science of surface finishing, and wood flooring design. Mercier's relentless pursuit to offer the very best of wood and our uncompromising reverence for it—from its inherent properties, nobility and authenticity—is what has enabled us to carve an enviable legacy that can never be equalled.

**There can only be one original. Mercier.**

## Passionate about wood. Driven by wood.

We fell in love with wood at first, second and third sight. It is naturally noble. It is undoubtedly authentic. It is inimitable. And we believe that wood does not require any artifice to make it beautiful. We master the art of handling wood to perfection because we respect its true essence—from its initial preparation to its finish. We rigorously select only the finest wood that is sourced responsibly from North American forests. We optimize each step of the production process to ensure impeccable and consistent quality, all while reducing waste. We remain constantly committed to bring out the very best in wood.

## It's all about the surface. Never superficial.

All it takes is a fine layer of finish on a wood floor's surface to reveal its authentic character and protect it for years to come. Mercier believes that the art of wood floors starts—and ends—with the perfect symbiosis between natural, living material and the science of finishes. For decades, we have developed an expertise in subtly mastering the complexity of wood surfaces.

## Ahead of the curve today. Classic tomorrow.

We believe in both the timelessness of wood and its ability to be fashionable today. Mercier has always been steps ahead in terms of our technological innovations as well as our designs. While our wood flooring collections are profoundly aligned with the latest in interior decorating, they are nevertheless infused with a classic style to remain striking day after day, year after year. Profoundly rooted in tradition, yet always on trend, our wood floors are developed based on a long-term vision and reverence for wood—as the source of our products and the source of our creativity.

Where inspiration begins.  
Where the magic happens.

# Invisible performance

Mercier Generations and Generations Intact 2500 finishes are the results of over 40 years of know-how and skills in mastering the science of prefinished wood flooring. These two solutions are recognized throughout the industry as leading references in quality and durability.

Mercier Generations and Generations Intact 2500 finishes meet the Greenguard Gold environmental certification standards. They are free from harmful chemical substances, emit no VOC emissions that are dangerous to human health, and help reduce the propagation of bacterial, germs and molds to keep any environment healthy.

Without a doubt, the best residential finish in the industry

A high-performance finish that simply cannot be matched. Its unique transparency preserves the richness and distinct character of wood. Our ingenious production methods ensure optimal finish adhesiveness to our wood floors, guaranteeing total peace of mind for years to come. The Greenguard Gold environmental certification—the highest on the market—is tangible proof that you are making a healthy choice for your living space. Mercier is ideal for a modern and active lifestyle.

Available glosses for the Mercier Generations finish: Satin, Matte and Matte-brushed (Red Oak, White Oak and White Ash only).

Pro and Pro-brushed (Red Oak only) glosses also available for the PRO Collection.<sup>1</sup>

#### RESISTANCE AND DURABILITY

- 1000 cycles with the TABER test<sup>2</sup> (500 for the competition)
- Scratch-resistance
- Perforation-resistance
- Flexible under impact
- Water-resistance
- Stain-resistance
- Non-yellowing
- Easy maintenance

#### WELL-BEING

- Antimicrobial
- Hypoallergenic
- Greenguard Gold environmental certification
- Contains plant-based oil

#### WARRANTY

35 years

residential applications

5 years

light commercial applications

20 years

residential applications, PRO Collection

<sup>1</sup> For more information regarding our glosses' availability, please refer to our website.

<sup>2</sup> The TABER test involves mounting a portion of a finished board onto a turntable fitted with sheets of abrasive paper. The degree of resistance is evaluated based on the number of rotations it takes to completely wear down the finish. The higher the number of cycles, the more resistant the finish.

52% more scratch-resistant than our Mercier Generations finish.<sup>3</sup>

The ultimate in commercial-grade quality... at home

A hectic lifestyle, lots of comings and goings, ultra-playful pets: your day-to-day life requires the performance of our Generations Intact 2500 finish. Proven over the years as a commercial finish, Generations Intact 2500 multi-layer finish and microfragmented aluminum particles creates a multipoint contact surface that is the most resistant in the industry to scratches and other impact. Thanks to its ultimate texture and durability, our finish withstands everyday wear and tear, such as your pets' claws, so that your floor can remain beautiful over time—just like the first day it was installed. Featuring uncompromising quality, easy maintenance and prestigious Greenguard Gold environmental certification.

Generations Intact 2500 is **available for residential and commercial applications**, on all our floors excluding Yellow Birch and American Walnut, as well as Element and PRO collections. Please refer to the current Product Chart for available selections.

Available glosses for the Generations Intact 2500 finish: Intact and Intact-brushed (Red Oak, White Oak and White Ash only).<sup>1</sup>

<sup>3</sup> Calculation according to the S-42 test, which measures the loss of luster. Results compare the Generations Intact 2500 finish versus the Mercier Generations finish (2019).

<sup>4</sup> According to the normal terms of use. Refer to the Mercier Warranty document.

#### RESISTANCE AND DURABILITY

- 2500 cycles with the TABER test<sup>2</sup> (1500 for the competition)
- Superior scratch-resistance
- Anti-perforation<sup>4</sup>
- Superior flexibility under impact
- Water repellent
- Superior stain-resistance
- Non-yellowing
- Easy maintenance

#### WELL-BEING

- Antimicrobial
- Hypoallergenic
- Greenguard Gold environmental certification
- Contains plant-based oil

#### WARRANTY

50 years

residential applications

3 years

commercial applications with direct outdoor access

10 years

light commercial applications

# How to shop for your wood floor?

Here are important aspects to consider.

## 1 Light or dark floors?

Would you like the floor to be the centerpiece of your design or would you like it to be more discreet and blend in with the decor? A floor alone can become the masterpiece of a room. Remember that lighter floorings help make a room seem larger, brighter and more airy. Dark flooring adds style and modernity to a decor and creates a warm and cozy environment.

## 2 What grade are you looking for?

The choice of a grade is simply a question of appearance of the floor and has no impact on its quality. Do you prefer floors with a contrasting or uniform appearance, or somewhere in between?

**Select & Better**  
Clear and uniform in appearance

**Distinction**  
Moderately contrasting in appearance

**PRO**  
Contrasting in appearance

**Authentic**  
Contrasting in appearance and more sustained character

**R&Q (Rift and Quarter Sawn)**  
Moderately contrasting in appearance

## 3 Which wood species best suits your preferences?

All wood species have a specific visual appearance. Mercier offers a variety of wood species from North American forests. Whether you prefer a clearly visible or more discreet grain, a darker or lighter natural shade, a more homogenous wood or one with character, Mercier has the right wood species for you.

## 4 Satin or Matte gloss finish?

A floor gloss serves the same purpose as the gloss in paint: it determines the level of light that reflects off the surface. Do you prefer a matte or even matte-brushed gloss with little reflection, that helps hiding wear and tear? Or even a satin gloss that gives a silky finish? Mercier offers a choice of gloss levels based on the light reflection desired.

## 5 Wide or narrow boards?

For fans of the modern, rustic or industrial look, wide boards make a room look more spacious. Narrow boards are better suited for classic or contemporary decors. Mercier offers widths from 2 1/4" up to 8 1/8".

## 6 About the finish

Mercier offers 2 high-performance solutions to protect your floor. The Mercier Generations ultra-durable finish suitable for normal residential use and the Generations Intact 2500 ultimate durability finish, which offers the ultimate in commercial-grade quality for residential and commercial spaces. Both contain plant-based oil and meet the requirements of Greenguard Gold environmental certification. They contain no harmful chemicals and emit no VOC emissions that are dangerous to human health.

## 7 Solid or Engineered platform?

### Solid

Made of 100% hardwood and offered in a choice of widths up to 4 1/4". Can be sanded up to 5 times.

### Engineered

Made of a hardwood plywood base and a real hardwood top layer, these floors offer several notable advantages including better adaptation to humidity variations and wider boards up to 8 1/8". Can be sanded 3 to 5 times depending on the product.

### Considering the subfloor

The subfloor will affect your choice of platform.

Solid flooring can be nailed or stapled to the subfloor and can be installed on the ground floor and upstairs. Engineered flooring versatility allows for a glued, stapled or nailed installation, and even floating for most species. They can also be installed over radiant heating systems.

A wood floor is made of a natural, living material with character marks, grain and color variations from one board to another. Unlike a ceramic or vinyl tile, each plank is unique and contributes to the lasting charm of a wood floor. Although wood is a noble material of great beauty, it is not indestructible and requires proper maintenance with the right products. Wood flooring remains the most ecological choice and is an investment in terms of aesthetics and longevity.

# The pioneer in sustainability

Our finishes contain  
plant-based oil

Mercier is one of the industry's pioneering manufacturers that has a long-term vision to reduce our ecological footprint for generations to come. We understand the importance of wood as a natural resource—and trees for the Earth's future. That is why we have implemented the most advanced environmental policies and sophisticated production methods throughout our entire supply chain to maximize the 5Rs of sustainability: refuse, reduce, reuse, repurpose and recycle.

## Controlled wood supply

We are committed to sourcing wood only from environmentally responsible suppliers and we are Lacey Act compliant. All of the species we use come from sustainably managed North American forests and adhere to rigorous traceability standards. With Mercier's wood flooring, you are guaranteed peace of mind knowing you are benefiting from the most outstanding quality and environmental stewardship.

## Sustainable production processes

Mercier's approach to sustainability is so thorough, we are proud to achieve the lowest amount of waste in the industry—2% vs 5% with other manufacturers. What's more: we reinsert 100% of our sawing residues back into the company to heat our factory, for example. All of our products are packaged using recycled and recyclable packaging.

## Greenguard Gold environmental certification

Mercier is one of the few manufacturers of pre-finished wood to be certified Greenguard Gold, the highest standard on the market. This certification confirms that our finishes are free of thousands of chemical substances that are harmful to human health, such as VOCs and other pollutants. We provide peace of mind to clients who are concerned about the air that they breathe.

## Floors that contribute to LEED certification

Our superior-quality floors, which contribute to making buildings LEED-certified, are designed to be the innovations of today and the classics of tomorrow.
